# **Introduction to DISC**

DISC is a simple, practical, easy to remember and universally applicable model. It focuses on individual patterns of external, observable behaviors and measures the intensity of characteristics using scales of directness and openness for each of the four styles:

Using the DISC model, it is easy to identify and understand our own style, recognize and cognitively adapt to different styles, and develop a process to communicate more effectively with others.

# **How to Use This Report**

The DISC report is divided into 3 parts: introducing the DISC model, helping you understand your own style, and identifying ways that you can apply your style strengths or modify your style weaknesses in order to meet the needs of others.

- Part I focuses on understanding each of the DISC styles and identifying characteristics, including the tendencies of each behavioral style
- Part II is about understanding yourself and will reveal information about the tendencies that make you unique
- Part III examines and explores adaptability and offers actionable recommendations for you and others who interact with you

With this personalized and comprehensive report, DISC gives you tools to help you become a better you - to develop and use more of your natural strengths while recognizing, improving upon, and modifying your limitations. Then, because we can easily see and hear these behaviors, we can quickly and accurately "read" other people and use our knowledge to enhance communication and grow our relationships.

**Please Note**: Any behavioral descriptions mentioned in this report are only **tendencies** for your style group and may or may not specifically apply to you personally.

# **Part I: Understanding DISC**

# **Behavioral Styles**

Historical and contemporary research reveal more than a dozen various models of our behavioral differences, but many share one common thread: the grouping of behavior into **four basic categories**.

The DISC styles are **Dominance**, **Influence**, **Steadiness**, and **Conscientiousness**. There is no "best" style. Each style has its unique strengths and opportunities for continuing improvement and growth.

The DISC assessment examines external and easily observable behaviors and measures tendencies using scales of **directness** and **openness** that each style exhibits.

# A Deeper Look at the Four DISC Styles

Below is a chart to help you understand some of the characteristics of each of the Four Basic DISC Styles, so you can interact with each style more effectively. Although behavioral style is only a partial description of personality, it is quite useful in describing how a person behaves, and is perceived, in personal, social and work situations.

			S	
			3	C
Tends to Act	Assertive	Persuasive	Supportive	Analytical
When in Conflict, this Style	Demands	Attacks	Complies	Avoids
Needs	Control	Approval	Routine	Standards
Primary Drive	Independence	Interaction	Stability	Correctness
Preferred Tasks	Challenging	People related	Scheduled	Structured
Comfortable with	Being decisive	Social friendliness	Being part of a team	Order and planning
Personal Strength	Problem-solver	Encourager	Supporter	Organizer
Strength Overextended	Preoccupation- goals over people	Speaking without thinking	Procrastination in addressing change	Overanalyzing everything
Personal Limitation	Too direct and intense	Too disorganized and nontraditional	Too indecisive and indirect	Too detailed and impersonal
Personal Wants	Control, Variety	Approval, Less Structure	Routine, Harmony	Standards, Logic
Personal Fear	Losing	Rejection	Sudden Change	Being Wrong
Blind Spots	Being held accountable	Follow through on commitments	Embracing need for change	Struggle to make decisions without overanalyzing
Needs to Work on	Empathy, Patience	Controlling emotions, Follow through	Being assertive when pressured	Worrying less about everything
Measuring Maturity	Giving up control	Objectively handling rejection	Standing up for self when confronted	Not being defensive when criticized
Under Stress May Become	Dictatorial, Critical	Sarcastic, Superficial	Submissive, Indecisive	Withdrawn, Headstrong
Measures Worth by	Impact or results, Track record	Acknowledgments, Compliments	Compatibility, Contributions	Precision, Accuracy, Quality of results

Gravitate toward quality control	Let them assess and be involved in the process when possible
Avoid conflict	Tactfully ask for clarification and assistance you may need
Need to be right	Allow them time to find the best or "correct" answer, within available limits
Like to contemplate	Tell them "why" and "how

# **Part II: Understanding Yourself**

#### **General Characteristics**

The narration below serves as a general overview of your behavioral tendencies as you see yourself, based on your responses to the assessment.

You are very self-reliant, and prefer to find your own solutions. You score like other independent people who may be considered "movers and shakers." This group tends to think quickly, decide quickly, and create opportunities and solutions where none existed before. All or much of this is done in a completely independent manner. That's a strength, for both you and your organization, as long as that strength is recognized.

You are a strong self-starter who shows a high sense of urgency to get things done... now. This is a prominent theme in your response pattern. Of all the behavioral styles, your response pattern tops the list for high urgency. The good news is that you're usually the first to get service, to offer an idea, and usually the first to cross the finish line on projects. The flipside is that some of those who helped you along the way might feel as if they are forgotten. Don't forget to acknowledge those who assisted, as you may require their assistance in the future.

You tend to rely more heavily on your own opinions than on the evaluations of others. This is a symptom of your independence and can potentially lead to some problems, especially where rules, details, or minutiae are concerned. This may result in cut corners or overlooked details. You may balance this by striving to seek input from those who might have more expertise in a particular area.

Sample, you prefer a change-oriented environment and may become bored when the pace slows. You score like those who tend to have an appetite for new ideas and are attracted to challenges like a magnet. However, once the project is successfully launched, your attention may wander to new ventures.

You are very direct and straightforward in communicating with others. You score like those who speak their minds, tell it like it is, and prefer bottom-line closure to ambiguity. You like to get things done quickly, and that includes conversations. You tend not to "sugar-coat" the message with unnecessary fluff.

You are an excellent problem solver who can think quickly on your feet to solve problems that arise. You are able to do this due to your rapid decisiveness, ability to multi-task, and your tendency to "blaze your own trail" rather than follow the beaten path. Be certain to involve others in the decision-making process, as an independent problem solver can sometimes be perceived as a problem creator.

You are a strong individualist who likes to forge your own path, and to be recognized for your achievements. Your responses to the instrument indicate that you are "field independent" in your operating style. That means that you blaze your own trails, sometimes without seeking much input from others. You may feel a greater sense of internal accomplishment when a success is achieved mostly on your own, without much guidance or assistance.

You frequently look for new, better, and more efficient ways of getting things done. Sample, you score like those who have a multi-tasking mind. You tend to have high urgency and little aversion to risk, often seeking ways to reduce costs (both money and time), and make systems more streamlined and efficient.

# **How Others Perceive and Describe You**

# **General Characteristics**

The narration below serves as a general overview of your behavioral tendencies as your observers see you. This is a result of how your observers responded to the assessments and uses the average of the graph scores.

You have the ability to persuade others, not with hype, but rather with warmth, sincerity, and understanding. These are perhaps considered "soft sell" tools, but they can make a big impact. This skill comes from the merging of your "people skills," along with the fact that you tend to be more modest when dealing with people.

Sample, the responses you gave indicate that you tend to be unselfish and sensitive to the needs of others. This is a rare type of generosity that comes with no strings attached, hidden agendas, or ulterior motives. People who score like you get a genuine "rush" when they are helping others. That's the up-side. The flipside is that you may need to monitor yourself closely to make sure you are not spreading yourself too thin in your efforts to please everybody.

You tend to have a long fuse and seldom become visibly angry or agitated. You may harbor internal anger, but you tend not to vocalize it to those involved, instead perhaps "venting" to others not involved in the project. Overall, you tend not to seek direct confrontation about what is making you upset, which is a good thing as long as you don't let such conflicts boil to the surface.

You score like those who prefer to establish long-term relationships, rather than brief, superficial ones. This perhaps comes from your preference toward stability in your lifespace, and longer-term relationships may bring that stability. Friendships and acquaintanceships you have made in the past are important to you, even now.

Your response pattern to the instrument indicates that you have an empathetic listening style. As you know, this is a rare gift. Some listening skills can be taught, but the inherent, sincere listening that you demonstrate is something innate.

Others may tend to seek you out for assistance or advice. This is because they perceive you as being sensitive to their needs, and because you provide a stable and consistent point of view for them. You may be seen as a coach or counselor that they can count on to listen to ideas and input. That's good, as long as it doesn't hamper your ability to complete your own tasks.

With regard to decision making, you tend to listen carefully to alternatives before making a judgment. The decisions you tend to make are not knee-jerk or crisis reactions, but rather thoughtful deliberations taken in a manner that considers the full scope of outcomes. This doesn't mean that all of your decisions are necessarily correct, just that they are informed.

Sample, your score pattern suggests a high degree of persistence and patience in working on projects. This can be especially important when the assignments are long, detailed, and involve a multitude of personal or complex tasks. Where others may lose patience and perhaps allow overall quality to lapse, you bring a unique pulse and tempo that can serve as a model for others.

# **Style Overview Comparison**

Compare your self-perception (left column) with your observers' perception (right column).

#### Your Behavioral Style (Self): Assessor

Assessors show a great ability to balance both the people side and the quality control side of various projects. Their people skills include being assertive without becoming aggressive, and this is engaging to the others they interact with. They are able to verbalize the necessity of maintaining standards. They excel at explaining strategy and the steps necessary to reach goals. They may become verbally critical when they see quality slipping, or when others are not as engaged.

# Below are some key behavioral insights to keep in mind and share with others to strengthen your relationships.

- Personal direction: Able to see both the big picture and the details
- Strengths offered: Dealing with people, maintaining urgency, and staying on the success pathway
- General characteristics: High orientation toward both people and quality control
- Contributions to others: Supports innovative ideas from others
- Getting along with others: Engages with people and keeps an eye on the correct procedures
- When stressed: May become fault-finding and impatient with others
- Keep in mind: May make assumptions and overstep their empowerment boundaries
- Additional notes: Good people skills and detail awareness, but may complain if things aren't going their way

#### Your Behavioral Style (Observers): Coach

Coaches bring a great trait, as they actively listen to others and provide sincere support for their efforts. They bring sensitive insight when engaging with others and can make solid contributions without demanding to be the center of attention. Coaches can diffuse tense situations with their insightful observations about the big picture and both individual and group goals. They show both stability and engagement with others. They can increase effectiveness with a bit more urgency and more specific direction to others.

# Below are some key behavioral insights to keep in mind and share with others to strengthen your relationships.

- Personal direction: Building personal connections and encouraging with positive feelings
- Strengths offered: A skilled and sincere stabilizing force in both good and difficult times
- General characteristics: Able to engage with people and be a sincere listener
- Contributions to others: Builds sincere relationships with others and provides a listening ear
- Getting along with others: Accepting and open attitude toward others
- When stressed: May become non-committal and overly trusting
- Keep in mind: May avoid taking a firm stand on divisive issues
- Additional notes: A great coach for everyone, but may need to take a more decisive stand at times

#### Word Sketch - As Your Observers See You

DISC is an observable, "needs-motivated" instrument based on the idea that emotions and behaviors are neither "good" nor "bad." Rather, behaviors reveal the needs that motivate that behavior. Therefore, once we can accurately observe one's actions, it is easier to "read" and anticipate their likely motivators and needs.

This chart shows your DISC Graph as a "Word Sketch." Use it with examples to describe why you do what you do and what's important to you when it comes **Dominance** of Problems, **Influence** of People, **Steadiness** of Pace, or **Conscientiousness** of Procedures. Share more about the specific needs that drive you in each area of FOCUS. If your DISC intensity scores at levels 1 and 2, your emotions and needs are the opposite of those at Levels 5 and 6 in that area.

# **DISC Graphs for Sample Report**

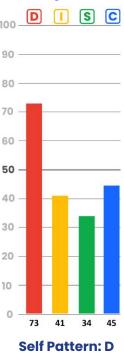

Your Adapted Style indicates you tend to use the behavioral traits of the **IC style(s)** in the focus area you had in mind when completing the assessment. Your Natural Style indicates that you naturally tend to use the behavioral traits of the **D style(s)**.

Your Adapted Style is your graph displayed on the left. It is **your perception of the behavioral tendencies you think you should use in your current environment, situation, or relationship.** This graph may change when you change roles or circumstances. The graph on the right is your Natural Style **and indicates the intensity of your instinctive behaviors and motivators**. It is often a better indicator of the "real you" and your "knee jerk," instinctive behaviors. This is how you act when you feel comfortable in your home environment and are not attempting to impress. It is also what shows up in stressful situations. This graph tends to be fairly consistent, even in different environments.

The solid bar graphs are your self-perception, and the striped bar graphs are the average observer scores.

#### Natural Style – Graph II

The higher or lower each **D**, **I**, **S**, **C** point is on your graph, the greater or lesser your behavior impacts your results at work and with others around you. Once aware, you can adapt your style to be more effective.

If the bars are similar, it means that you tend to use consistent behaviors in various environments. If your Adapted Style is different from your Natural Style, you are likely shifting behavior, which may cause stress or depleted energy if done for a significant amount of time.

If you have scores under 10 or over 90, these are extended scores where the behavior becomes a **need**. If expressing that behavior isn't possible, you'll likely create situations where that behavioral need can be met.

#### **Behavioral Pattern View**

The BPV has eight behavioral zones. Each zone identifies a different combination of behavioral traits. The peripheral descriptors describe how others typically see individuals with your style. Plots on the outer edges of the BPV identify that one factor (**D**, **I**, **S**, or **C**) of your style will dominate the other three. As you move towards the center of the BPV, two and eventually three traits combine to moderate the intensity of your style descriptors within a specific behavioral zone. +The plus sign indicates that the preceding style score is higher, moving you closer to that style zone (i.e. **CD+S**: The **D** score is stronger than in **CDS** so it plots closer to the **D** behavioral zone).

# **Communication Tips**

The following suggestions, as your observers perceive your communication preferences, can help you interact with others.

# When Communicating with Sample, DO:

- Break the ice with a brief personal comment.
- Plan some extra time in your schedule for talking, relating, and socializing.
- Ask for Sample's input regarding people and specific assignments.
- Be candid, open, and patient.
- Show sincere interest in Sample as a person.
- Plan to talk about things that support Sample's dreams and goals.
- Provide assurances about Sample's input and decisions.

# When Communicating with Sample, DON'T:

- Offer assurances and guarantees you can't fulfill.
- Leave decisions hanging in the air. Be certain all decision points have reached closure and result in plans for action.
- Talk down to Sample.
- Be overly task-oriented.
- Manipulate or bully Sample into agreeing.
- Leave the idea or plan without backup support.
- Be impersonal or judgmental.

#### **Your Motivators: Wants and Needs**

Motivation is the enthusiasm or willingness to do something. Everybody is motivated; however, all people are motivated for their own reasons, not somebody else's. Simply, people are motivated by what they want.

Our behaviors are also driven by our needs. Each style has different needs. If one person is stressed, they may need quiet time alone; another may need social time around a lot of people. Each has different ways to meet their needs. The more fully our needs are met, the easier it is to perform at an optimal level.

The bullet points below are based on your observers' views of your style.

#### You Tend to Be Motivated By:

- Flexibility to circulate and talk with a variety of people.
- Evidence that a new process has been successful in similar applications.
- Projects and assignments that provide interpersonal contact, and an opportunity to help both internal and external stakeholders.
- Acceptance as a positive and supportive member of the organization and team.
- A work culture that is supportive of family activities and commitments.
- A supervisor, manager, or board who practices a democratic leadership process.
- Identification with the organization, team, and others with whom a spirit of work responsibility has been established.

# People With Patterns Like You Tend to Need:

- A sense of belonging to the team or organization as a whole.
- More direction toward work tasks, and less focus on chatting and socializing.
- To be more realistic and ambitious in setting deadlines for team projects.
- Encouragement to keep the positive spirit and optimism when the pressure is on.
- Increased urgency in decision making.
- To be kept in the information loop regarding projects and initiatives within the organization.
- To get better control of files and record keeping.

# What you Bring to the Organization

This page provides useful insights for a job or as you work together on a team or family project. These are the talents and tendencies you bring... as your observers perceive your behavioral strengths. When used in environments in which you are most effective, you are likely to be self-motivated to accomplish great things. It is possible that you may not always be in an environment that allows you to be your best.

# **Your Strengths:**

- You are able to build positive relationships with internal and external stakeholders.
- You are able to negotiate conflicts into win-win situations.
- You are a good listener.
- You bring a high "sincerity factor" to the team climate.
- You are very people-oriented and, as a result, are able to talk with new people very easily in small groups or in large audiences.
- Your strong optimism helps motivate the team toward their goals.
- You are able to reach goals by working with and supporting the efforts of others on the team.

# **Your Work Style Tendencies:**

- You show a high degree of persistence in working on projects, especially over the long haul.
- You tend not to force your own ideas on others with edicts, but rather by offering considered suggestions.
- On the job, you have a strong need to be patient, polite, and create an environment of good-will for internal and external stakeholders.
- You meet new people easily and prefer networking with others rather than working in solitary conditions.
- At work, you tend to have a "long fuse," and are not easily angered, although you may take some of the anger home to vent.
- On the job, you tend to say "yes" more often than "no," when asked to help out with a colleague's project or problem.
- You are perceived by others on the team as a good listener.

#### You Tend to Be Most Effective In Environments That Provide:

- Clear responsibility and lines of authority to avoid confusion or overlapping initiatives.
- A participatory manager or board with whom a democratic relationship has been established.
- A work culture that takes pride in the systems, processes, and people working behind the scenes.
- A balance between some stable, predictable work activities and some variety and change on a regular basis
- A favorable working climate containing positive attitudes and optimistic spirit.
- A work culture that allows for your natural interest in helping others learn and grow professionally.
- A job culture where there is little hostility, confrontation, anger, or pressure.

# The D Style

#### **Behavior and Needs Under Stress**

Stress is unavoidable. The way we behave under stress can create a perception that is not what we intend, which can influence our effectiveness and our interaction with others. We may need additional support during periods of stress. By knowing "how we show up" and what support could be helpful. By being able to prepare ourselves for how we behave in conflict, as well as identifying strategies to reduce conflict, we can be much more successful in stressful circumstances. The bullet points below are based on your observers' views of your style.

# **Under Stress, You May Appear:**

- Manipulative
- Inconsistent
- Impulsive
- Wasteful of time
- Superficial

#### **Under Stress You Need:**

- To get credit
- A quick pace for stimulation and excitement
- Action and interaction

# **Your Typical Behaviors in Conflict:**

- When you experience a moment of misery, you may appear overeager, impulsive, sarcastic and demanding. You may disregard the facts, and may not listen well to what is being said (only hearing what you want to hear).
- You may experience a desire to get even if someone thwarts a major component of your personal agenda; however, you are not very likely to follow through. You may choose to overlook the matter in order to preserve the relationship or you may simply lash out in anger.
- If a conflict persists or your anger increases, you are likely to lash out with a strong verbal attack on the other person. This may have a startling effect on others since it is so unlike your normal behavior.

# Strategies to Reduce Conflict and Increase Harmony:

- Be sure to fulfill all of your commitments. If you will be unable to keep a commitment or meet a
  deadline, inform the people involved as soon as possible. Do not assume that others will automatically
  step in to cover for you.
- Avoid giving others a false impression of the level of support you will give them. When promising your support, make clear precisely what it is that you will do.
- Recognize that you can never resolve conflict by avoiding it. While you may be concerned that you will
  damage a relationship while expressing your needs or clarifying your expectations, respectfully dealing
  with issues will allow you to leave them behind you. Be sure, of course, to listen attentively to their
  concerns and respond appropriately.

# **Potential Areas for Improvement**

Everyone has struggles, limitations, or weaknesses. Oftentimes, it's simply an overextension of our strengths which may become a weakness. For example, a High D's directness may be a strength in certain environments, but when overextended, they may tend to become bossy.

As you consider ways to continue to improve to be a better communicator, we recommend you focus on no more than two potential areas of improvement at a time, practice and strengthen them, and then choose another area or two to focus on and improve. The bullet points below are based on your observers' views of your style.

#### **Potential Areas for Improvement:**

- You may have difficulty with quick decision making because of your need to consider the "people side" of all issues.
- You may need some coaching in time management; for instance, in setting more ambitious deadlines.
- You may be rather indirect in providing instructions, because you don't want to impose your will on others.
- You may be a bit of a grudge-holder toward those who offer criticism.
- You may hesitate to correct or discipline those who report to you, for fear of offending someone.
- You may tend to take constructive criticism personally, possibly losing focus as to how it relates to the task.
- You may show less emphasis on productivity and more emphasis on the "people side" of a project.

# 12 Behavioral Tendencies

The primary styles - D, I, S, and C - are each influenced by the other three styles in our behavioral expression. You are not just **one** of these styles; you are the result of all four combining and affecting each other. On this page you'll see all 12 Behavioral Tendencies in Summary, and the following pages deliver more detail about each of these measurements. You can see both yourself and your observers' information for comparison.

# 12 Behavioral Tendencies – Details & Graphs

For each of the 12, you will see a graph and personalized statement for your Natural and Adapted style. These scores and statements reveal which of your style combinations are most observable and describe how you express that tendency based on your **D**, **I**, **S**, and **C** blend.

#### **Interpretation Notes:**

- Frequency Observed: The behavioral tendencies are presented in the order from Most Frequently
  Observed to Least Frequently Observed.
  - a. HI Clearly observed in most situations, seen more often
  - b. HM Frequently observed in many situations
  - c. MOD May or may not be observed depending on the situation
  - d. LM Sometimes observed in some situations
  - e. LOW Absence of the behavior in most situations
- 2. **Direction of your score** As the graph moves to the right or left, it shows how you will likely express the behavior. If the graphs are near the center, the result is a balancing behavioral effect that will depend on the situation.
- 3. **General Population Comparison** The blue box represents the general population in this behavioral tendency. Approximately 68% of people score in this range.
- = Self Perspective: Adapted
- = Observer Perspective

#### **Building Rapport**

**Self (HM):** You are somewhat social and more likely to focus on building relationship and making connections, rather than accomplishing a goal or completing a task. Don't forget that sometimes there are things to be done.

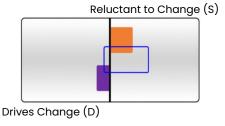

Observers (HM): Consistent with natural style

# Relationships-Focused (I) Results-Focused (D)

#### **Change Resistance**

**Self (HM):** You are somewhat change oriented as long as you can prepare for it and understand the expectations associated as well as the reasons for the needed adjustments. You are likely to respond/interact in change by building understanding first, and then planning how to successfully navigate what may come. You won't always have time to fully prepare so flexibility and openness can be a benefit

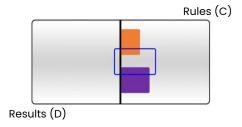

**Observers (MOD):** You can be slow to accept or embrace change or more committed to your own thoughts and ideas during times of change, depending on the level of risk and expected outcome. There may be times when you actively accept and engage in change and other times you feel like more information and planning would be beneficial. You are likely to be on board, as long as things make sense.

#### **Prioritizing**

**Self (HM):** You often focus on following established structural and procedural guidelines to ensure high-quality outcomes with great importance on accuracy, order and precision. You are likely to prioritize the rules rather than the results. While the rules and procedures are a key component to success and what should take precedence, be sure you know what the end result should be.

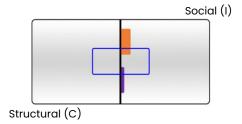

Observers (HM): Consistent with natural style

#### **Expressing Openness**

**Self (MOD):** Your comfort is balanced between your ability to interact with others and build personal connections, while still maintaining a focus on structure, detail and accuracy, and you may struggle with maintaining a consistent pace or focus. You can be confident with both social interactions and information to support your perspective.

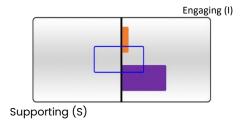

#### **Customer & Team Interaction**

**Self (MOD):** You can be engaging and persuasive while providing support and stability in your interactions with others. You are likely to balance the needs of others, creating a relationship and ensuring their needs are met. This can effectively create loyal and trusting relationships.

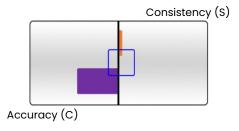

**Observers (HM):** You are somewhat engaging, charming, persuasive, and influential, often connecting with others in a way that builds trust and confidence. You are more likely to focus on engaging with the others to create a relationship, interacting with them to build a friendship to ensure they will come back to work with you directly. Sometimes business should be just business.

#### **Work Process Alignment**

**Self (MOD):** Your process and follow through is balanced between keeping things methodical and steady and upholding quality standards to be sure what you are doing is accurate and precise. There may be times when you process information and then follow through based on an equal emphasis on accuracy and consistency. These two, when balanced, will ensure great outcomes.

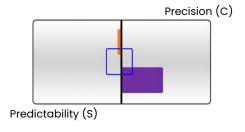

**Observers (MOD):** Your process and follow through is often driven by upholding quality standards to be sure what you are doing is accurate and precise. You are likely to process information and follow through with exactness and precision as a focus. There are times when consistency is as important as accuracy. Don't forget to balance them.

#### Accuracy

**Self (MOD):** Your plans are a combination of careful deliberations to ensure quality outcomes, and systems and processes that allow forward movement in a steady environment. You are likely aware of both predictability and precision when making plans. You will have more positive outcomes when using balanced planning.

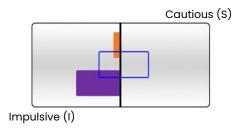

**Observers (HM):** You frequently focus on carefully and deliberately ensuring high-quality outcomes with great importance on accuracy, structure, order and precision in all you do. You are likely to focus on being and doing things right. While doing it the right way can impact success dramatically, it is also helpful to have dependability and uniformity in planning processes.

#### **Careful Decision Making**

**Self (MOD):** You balance careful attention and consideration of risks, but may also act more impulsively, going with your gut and intuition. Your decisions can be based on a balanced approach of logic and emotion where you will do what feels right and also what makes sense while being attentive to risks.

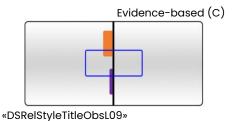

**Observers (LM):** You are somewhat impulsive based on feelings rather than taking the time to consider the risks and consequences. You are likely to make decisions spontaneously and emotionally, trusting your gut and going with what feels right. Sometimes it is important to see if it makes sense too, not just feels good.

#### Reasoning

**Self (MOD):** You may rely somewhat on your feelings and interactions with others to make decisions, and choose what is likely to be considered acceptable but will seek to back up judgments with evidence and verification. When reasoning, you likely rely on a balanced approach of logic and emotion, and look at the circumstances with a logical perspective and also paying attention to what feels right.

Observers (MOD): Consistent with natural style

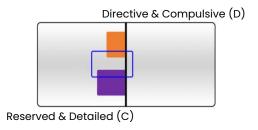

IC/D Style Observer Style: Isc

#### **Providing Instruction**

**Self (LM):** You are more likely to precisely follow established structural and procedural guidelines, and are aware of the need for accuracy and compliance to certain guidelines and protocol. Sometimes, bending the rules slightly is important to getting the best results.

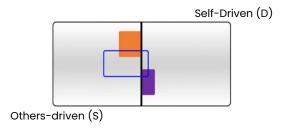

Observers (LM): Consistent with natural style

#### **Personal Drive**

**Self (LM):** Your determination is somewhat steady, supportive and less urgent, considering relationship consequences before acting. You will likely be driven to action based on the expectations of others which may mean you take on more than your fair share or stretch yourself too thin when you make commitments.

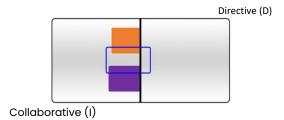

**Observers (MOD):** Your determination is balanced between a self-driven and others-driven approach, focusing on actions to achieve results with awareness of risks and consequences of actions. You are likely driven by both a desire to meet your own needs and motivations, and support and help others in the process.

#### Self-Reliance

**Self (LM):** You are quite attentive to involving others, preferring to reach results together, which may impact efficiency. You will likely do your best work in collaboration with others. Be aware that too much interaction may cause some delays in productivity or efficiency.

Observers (LM): Consistent with natural style

# **Summary of Sample Report's Style**

Communication is a two-way process. Encourage others to complete their own DISC Self 360° Online Assessment and then share the Summary Sheet with each other. By discussing preferences, needs and wants of the people you work with, socialize with and live with, you can enhance these relationships and turn what might have been a stressful relationship into a more effective one just by understanding and applying the DISC Self 360° information. # Part III: Understanding Others and Adaptability

Understanding your own behavioral style is just the first step to enhancing relationships. To really begin to use the power of behavioral styles, you also need to know how to apply the information to other people and in other situations. Good relationships can get better and challenging relationships may become good.

People want to be treated according to their behavioral style, not yours.

People generally make the mistake of assuming that others interact and think the same way they do, and many of us grew up believing in The Golden Rule: treating others the way you would like to be treated. Instead, we encourage another practical rule to live by - what Dr. Tony Alessandra calls The Platinum Rule®: to treat others the way THEY want to be treated. This practice requires strategic adjustment made on a case-by-case basis, and adjusting your own behavior to make people feel more at ease with you and the situation is known as Adaptability.

It is important to remember that adapting our styles is not always easy! It may take some time, feel very difficult, or seem especially foreign in certain situations. Give it time, practice, patience and diligence and you will see relationship benefits.

# **Adaptability**

# **The Application Section Includes:**

- What is Adaptability?
- How to Identify Another Person's Behavioral Style
- Communicating with Each Style
- How to Adapt to the Different Behavioral Styles
  - Modifying Directness/Indirectness
  - Modifying Openness/Guardedness
  - Modifying Pace & Priority
- Adapting in Different Situations
  - o At Work
  - o In Sales and Service
  - In Social Settings
  - o In Learning Environments
- Application Activities

# What is Adaptability?

Adaptability is based on two elements: **Flexibility and Aptitude**. **Flexibility** is your **Willingness** and **Aptitude** is your **Capability** to adjust your approach or strategy based on the particular needs of the situation or relationship at a particular time. It's something you must **cognitively choose to apply** to yourself (to your patterns, attitudes and habits), not expect from others.

We practice adaptability each time we slow down for a C or S style; or when we move a bit faster for the D or I style. It also occurs when the D or C styles take the time to build the relationship with an S or I style, or when the I or S style focuses on facts or gets right to the point with D or C styles.

Adaptability does not mean an "imitation" of the other person's style. It does mean adjusting your openness, directness, pace, and priority in the direction of the other person's preference, while maintaining your own identity. Adaptable people know how to negotiate relationships in a way that allows everyone to win.

Your adaptability level influences how others judge their relationship with you. Raising your adaptability will increase trust and credibility; if you lower your adaptability, trust and credibility will decrease. Being more adaptable enables you to interact more productively with difficult people and helps you to avoid or manage tense situations.

# **Important Considerations:**

- Adaptability is important to **all** successful relationships.
- No one style is naturally more adaptable than another.
- Adaptability is a choice:
  - o You can choose to be adaptable with one person, and not so with others.
  - You can choose to be quite adaptable with one person today and less adaptable with that same individual tomorrow.
- People often adopt a different style in their professional lives than they do in their social and personal lives.
  - o We tend to be more adaptable at work and with people we know less.
  - o We tend to be less adaptable at home and with people we know better.

#### **Words of Advice**

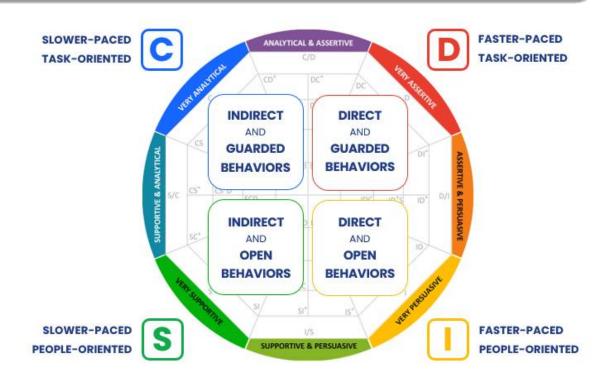

Adaptability at its extreme could appear wishy-washy and two-faced. A person who maintains high adaptability in all situations may not be able to avoid stress and inefficiency. There is also the danger of developing tension from the stress of behaving in a "foreign" style. Usually, this is temporary and may be worth it if you gain rapport with others. At the other end of the continuum, no adaptability would cause others to view someone as rigid and uncompromising because they insist on behaving according to their own natural pace and priority.

# **Recognizing Another Person's Behavioral Style**

#### 2 Power Questions:

- 1. Are they <u>DIRECT/FAST-PACED</u> or <u>INDIRECT/SLOWER-PACED</u> in their communications? (Directness is the 1st predictor of Style. Direct plots on the right, Indirect on the Left).
- 2. Are they <u>GUARDED/TASK-ORIENTED</u> or <u>OPEN/PEOPLE-ORIENTED</u> in their communications? (Openness is the 2<sup>nd</sup> predictor of Style. Open plots on the Bottom, Guarded on the Top).

When we integrate both the natural tendency to be either **DIRECT** or **INDIRECT** with the natural tendency to be either **GUARDED** or **OPEN**, it forms the foundation and the basis for plotting each of the four different behavioral styles:

	Directness & Openness	Pace & Priority
D	Tends to be <b>direct</b> and <b>guarded</b>	Fast-paced and task-oriented
	Tends to be <b>direct</b> and <b>open</b>	Fast-paced and people-oriented
S	Tends to be <b>indirect</b> and <b>open</b>	Slow-paced and people-oriented
C	Tends to be <b>indirect</b> and <b>guarded</b>	Slow-paced and task-oriented

# **Communicating with Each Style**

# With D Styles

- Show them how to win
- Display reasoning
- Provide concise data
- Agree on goals and boundaries
- Vary routine
- Compliment them on what they have done
- Provide opportunities for them to lead, impact results

# With [ ] Styles

- Show them that you admire and like them
- Be optimistic
- Support their feelings and ideas
- Avoid involved details
- Focus on the big picture
- Interact and participate with them - do it together
- Provide acknowledgements, accolades, and compliments

# With S Styles

- Show how your idea minimizes risk
- Demonstrate interest in
- Compliment them on follow through
- Give personal assurances
- Provide a relaxing, friendly, stable atmosphere
- Act non-aggressively, focus on common interests
- Provide opportunities for deep contribution and teamwork

# With C Styles

- · Approach indirectly, non-threatening
- Show your reasoning, logic, give data in writing
- Allow them to think, inquire, and check before they make decisions
- Tell them "why" and "how"
- Provide opportunities for precision, accuracy, and planning for quality results

- Write things down

# S STEADINESS STYLE

#### **Help Them To:**

- Utilize shortcuts and discard unnecessary steps
- Track their growth
- Avoid doing things the same way
- Realize there is more than one approach to tasks
- Become more open to some risks and changes
- Feel sincerely appreciated
- Speak up and voice their thoughts and feelings

# **C** CONSCIENTIOUSNESS STYLE

#### **Help Them To:**

- Share their knowledge and expertise with others
- Stand up for themselves with the people they prefer to avoid
- Shoot for realistic deadlines and parameters
- View people and tasks less seriously and critically
- Balance their lives with both interaction and tasks
- Keep on course with tasks, less checking
- Maintain high expectations for high priority items, not everything

# **Adapting in Sales and Service**

# **D** DOMINANCE STYLE

- Plan to be prepared, organized, fast-paced, and always to the point
- Meet them in a professional and businesslike manner
- Learn and study their goals and objectives what they want to accomplish, how they currently are
  motivated to do things, and what they would like to change
- Suggest solutions with clearly defined and agreed upon consequences as well as rewards that relate specifically to their goals
- Get to the point
- · Provide options and let them make the decision, when possible

# I INFLUENCE STYLE

- Take the initiative by introducing yourself in a friendly and informal manner and be open to new topics that seem to interest them
- Support their dreams and goals
- Illustrate your ideas with stories and emotional descriptions that they can relate to their goals or interests
- Clearly summarize details and direct these toward mutually agreeable objectives and action steps
- Provide incentives to encourage quicker decisions
- Give them testimonials

# S STEADINESS STYLE

- Get to know them more personally and approach them in a non-threatening, pleasant, and friendly, but professional way
- Develop trust, friendship, and credibility at a relatively slow pace
- Ask them to identify their own emotional needs as well as their task or business expectations
- Get them involved by focusing on the human element... that is, how something affects them and their relationships with others
- Avoid rushing them and give them personal, concrete assurances, when appropriate
- Communicate with them in a consistent manner on a regular basis

# C CONSCIENTIOUSNESS STYLE

- Prepare so that you can answer as many of their questions as soon as possible
- Greet them cordially, but proceed quickly to the task; don't start with personal or social talk
- Hone your skills in practicality and logic
- Ask questions that reveal a clear direction and that fit into the overall scheme of things
- Document how and why something applies
- Give them time to think; avoid pushing them into a hasty decision
- Tell them both the pros and cons and the complete story
- Follow through and deliver what you promise

# **Adapting in Social Settings**

# **D** DOMINANCE STYLE

- · Let them know that you don't intend to waste their time
- Convey openness and acceptance of them
- Listen to their suggestions
- Summarize their achievements and accomplishments
- Give them your time and undivided attention
- Appreciate and acknowledge them when possible

# I INFLUENCE STYLE

- Focus on a positive, upbeat, warm approach
- Listen to their personal feelings and experiences
- Respond openly and congenially
- Avoid negative or messy problem discussions
- Make suggestions that allow them to look good
- Don't require much follow-up, detail or long-term commitments
- · Give them your attention, time and presence

# S STEADINESS STYLE

- Focus on a slower-paced, steady approach
- Avoid arguments and conflict
- Respond sensitively and sensibly
- Privately acknowledge them with specific, believable compliments
- Allow them to follow through on concrete tasks
- Show them step-by-step procedures
- Behave pleasantly and optimistically
- Give them stability and minimum of change

# C CONSCIENTIOUSNESS STYLE

- Use a logical approach
- Listen to their concerns, reasoning, and suggestions
- Respond formally and politely
- Negative discussions are OK, so long as they aren't personally directed
- Privately acknowledge them about their thinking
- Focus on how pleased you are with their procedures
- Solicit their insights and suggestions
- Show them by what you do, not what you say

# **Adapting in Learning Environments**

# **D** DOMINANCE STYLE

- Likes to learn quickly; may be frustrated with a slower pace
- Has own internal motivation-clock, learns for their own reasons, not for anyone else's reasons
- May like to structure their own learning design
- Does okay with independent self-study
- Defines own goals
- May have a short attention span

# I INFLUENCE STYLE

- Likes learning in groups
- Interacts frequently with others
- Responds to extrinsic motivation, praise, and encouragement
- Needs structure from the facilitator; may lose track of time
- Needs "what to do" and "when to do it"
- May exceed deadlines if left on their own and learning may be completed late

# S STEADINESS STYLE

- Accepts a balance between individual and group work
- Shows patience with detailed or technical processes
- Likes journaling and follow-through
- Prefers explicit instructions
- Wants to know the performance outcomes and expectations
- May need help in prioritizing tasks if a long assignment; may take criticism personally

# C CONSCIENTIOUSNESS STYLE

- Prefers individual work over group interaction
- Accepts more impersonal training, such as remote or on-line
- Has high expectations of their own performance
- Will structure their own activities only with explicit goals and outcomes established
- Emphasizes details, deep thinking, and theoretical bases for the learning
- May get overly bogged down in details, especially if the learning climate is pressured

# **Application Activities**

# **Adaptability Practice**

Spend some time with people at home and at work that you know and trust who are different styles than you. Explore ways to communicate more effectively with them. Ask for support and feedback as you try new ways to communicate. Remember- tell them this is a skill you are building so they aren't surprised when you are behaving differently and can provide helpful feedback!

- Practice Identifying their style based on observable behavior
- Practice Modifying your Directness and Openness in conversation with them
- Practice Modifying your Pace and Priority
- Ask for feedback on your effectiveness in communicating with them
- Take some time to reflect on your experience and what worked or didn't work for you and for them
- **Consider** what you should repeat, and what you need to modify further to communicate as effectively as possible.

As you begin feeling more comfortable with adaptability and the needs of each style, try it with others!

# **Adaptability Activity**

Select a relationship in which things have not gone as smoothly as you would like. Make a commitment to take the time to gain an understanding of the other person's behavioral style and take a few steps to adapt your behavior to improve the relationship.

- 1. Identify the behavioral style of the other person using the 2 Power Questions:
  - **a.** Are they <u>DIRECT or INDIRECT</u> in their communication?
  - **b.** Are they <u>GUARDED or OPEN</u> in their communication?
- 2. Brush up on their style and look at ways to adapt your Directness and Openness when working with them.
- 3. To further understand the tension that may exist in the relationship, notice the difference in preference in pace and priority and modify accordingly.
- 4. Practice approaching them in the way you think **THEY want to be treated**. Remember, it may feel uncomfortable at first, but with practice and dedication to adapting, you will be amazed at the difference.

# **Tension Among the Styles Exercise**

Even if you have the highest regard toward a person, tension can exist in a relationship where styles are different. If this is behavior related, applying The Platinum Rule® - Treat others the way THEY want to be treated - may be helpful. Complete this exercise to gain insights on how to improve tense relationships. If you feel comfortable, you may discuss with the other person things you can do to ease the tension.

#### **Create a DISC Power Team**

Wouldn't it be amazing to have a DISC POWER TEAM where all members brought their best strengths to the table, and each of our challenges could be supported by someone who was skilled in the areas we struggle?

Considering the strengths and workplace behaviors for each style, who would be an ideal DISC POWER TEAM Member?

For an upcoming project, consider how your DISC POWER TEAM could accomplish greatness!

- Assign responsibilities based on strengths
- Determine what opportunities or challenges exist or may come up
- Give each Team Member the opportunity to showcase their skills and experience
- Check in regularly and discuss as a team how it's going
- · Provide feedback regarding roles, strengths, needs, and any additional support required

#### So Now What?

This report is filled with information about your behavioral style and the styles that you will encounter in others. There are many suggestions in the application section of this report for you to apply this information. Take the next step and DO the exercises. Don't put this report on a shelf or in a file. Knowing your own style is just the beginning—you must be able to apply this information to improve all of your relationships.

Continually use this report as a reference tool. It contains a lot of information and was never meant to be digested in a single reading. Experiment with making a few changes in your behavior and examine the results. You might be surprised!

# **ASI Validation**

#### Why is Independently Tested Accuracy of this Assessment Important?

A recent review found that the majority of assessments available today lack reporting to verify their accuracy. Of the small minority which claimed reporting, the significant majority of those were conducted privately; oftentimes by the assessment provider itself, rather than an objective and scientifically qualified third party. However, we are leading by example in this otherwise unregulated industry. How are we doing this? By submitting our assessments to an objective, independently conducted battery of tests: Construct Validity, Reliability, and Disparate Impact – all by a qualified scientific authority (Assessment Standards Institute). Our goal? Ensuring the trust and confidence of our users by producing the industry's most accurate and class protected assessments.

#### The Assessment Industry's Past and Present

Assessments have been used since the mid-20th century, initially relied upon by Fortune 500s, calculated by highly skilled PhDs and produced by only a handful of trusted developers. With the advent of the internet in the 1990s, the ability to produce, market, and sell assessments became exponentially easier and less expensive. Since then, it has developed into a kind of "global cottage industry" with hundreds of new assessment developers, producing thousands of different assessments. Each developer purporting its assessments to be scientifically accurate instruments – sold, resold and used by individuals and organizations of all kinds; including many of our largest institutions like Fortune 500s, major universities, world governments, and even military. Frighteningly, this "global cottage industry," which produces data relied upon by millions, is entirely unregulated with nothing to ensure its consumers are receiving what they are being told and sold. There are zero requirements, safeguards, laws or regulations ensuring the consumer receives a scientifically accurate instrument – or even what the developers and sellers claim.

#### The Solution? Independent & Verifiable Testing by a Qualified Institution

The Assessment Standards Institute (ASI) provides our assessments with verifiably objective testing and reporting that meet standards set by the American Psychological Association (APA) and the Equal Employment Opportunity Commission (EEOC). This battery of tests is both voluntary and verifiably transparent. Our goal? To ensure this assessment's professional merit and scientific accuracy for you, the user. These reports are readily available upon request and include:

# Construct Validity (APA Standards)

Construct validity is one of the most central concepts in psychology. It is the degree to which a test measures what it claims, or purports to be measuring. Researchers generally establish the construct validity of a measure by correlating it with a number of other measures and arguing from the pattern of correlations that the measure is associated with these variables in theoretically predictable ways.

# Reliability - Cronbach's alpha (APA Standards)

This technique is regarded as one of the most robust measures of reliability and presents the highest 'bar' from which to compare. The readers should note that Cronbach's alpha is the method selected for this instrument, because of its high standards. The reader is encouraged to compare reliability coefficients presented herein to other vendors, and also to ask those vendors which reliability formulas they used to compute their reliability coefficients. Cronbach's alpha is a measure used to assess the reliability, or internal consistency, of a set of scale or test items. In other words, the reliability of any given measurement refers to the extent to which it is a consistent measure of a concept, and Cronbach's alpha is one way of measuring the strength of that consistency.

# Disparate Impact (EEOC Guidelines)

Employers often use tests and other selection procedures to screen applicants for hire and employees for promotion. The use of tests and other selection procedures can be a very effective means of determining which applicants or employees are most qualified for a job. However, use of these tools can also violate the EEOC Guidelines if they disproportionately exclude people in a protected group by class, race, sex, or another covered basis. Importantly, the law does allow for selection procedures to select the best candidates based on job related requirements. If the selection procedure has a disparate impact based on race, color, religion, sex, or national origin, the employer is required to show that the selection procedure is job related and consistent with business necessity. If discrimination exists, the challenged policy or practice should therefore be associated with the skills needed to perform the job successfully.
